Point of Sale Solution

Retail Software POS Professional© is an integrated, point-of-sale software designed for the small retail operation or a chain of small retail stores.

In today's competitive environment, retailers must focus on acquiring and retaining customers, and maximizing the operating efficiencies to keep business at a profitable level.

In addition to its powerful POS features and ease-of-use, Retail Software POS Professional© provides the customer relationship management and marketing tools that will help small and medium-sized retailers effectively compete with the operational and marketing staff of large chain stores.

More and more, computerizing your store has become a competitive necessity. Research shows that successful businesses have systems in place to insure control and ultimately, profitability.

And it's no surprise. After all, can your cash register keep track of your customers, inventory, sales, gift certificates, get more repeat business and give you the quick, down-to-the-penny financial data you need to manage your company? Could it ever reduce your paperwork, costs and time?

With a PC as your "smart" cash register and Retail Software POS Professional©, the answer to all these questions is : YES!

Easy to use

A graphical screen lead the cashier through each step of the sale. First, sign in as cashier.

Cashier Sign In Money Count Station #1

DAVID BROWN starts shift with the following:

Register Start Amount: 0.00

* Total Credit Cards: 0.00

* Total Checks: 0.00

* Total on Account: 0.00

Total Money Count: 0.00

Buttons: Accept Totals, Cancel

* Tip: If the cashier also receives the register with Credit Card Coupons, Checks, or House Account Receipts signed by customers, their respective amounts must be entered here.

Next, click with your mouse on the button **SALE**, which is located on the program's toolbar. The **order entry window** will be brought to the screen.

Items may be selected by:

- Entering an item's code.
- Entering an item's name.

Invoice #1

Item Code: F7_Lookup Item by Name
